EDUCATION

- **University of Management and Technology, Lahore** | BS Computer Science | CGPA: 3.28 | Oct 2023 – Present
- **Relevant Coursework:** Data Structures & Algorithms, OOP, Software Engineering, Advance Web Development
- **Leadership & Activities:** Team Lead – Hotel Management System Project, Class Representative, Volunteer at Ghaza March Event

PROJECTS

Health Management App | Flutter | Team Lead & UI Designer | Jan 2025 – Mar 2025

- Led a 5-member team to develop a healthcare app for doctor booking, appointment management, and patient report tracking.
- Designed responsive and user-friendly Flutter UI screens with focus on accessibility and smooth navigation.
- Implemented patient history tracking for consultations, prescriptions, and medical reports.
- Managed project coordination, testing, and presentation workflow using collaborative development practices.

Library Management System | C++ Console Application | Mar 2025 – Aug 2025

- Developed a console-based system to manage books, members, borrowing, and return records.
- Applied OOP concepts including inheritance, encapsulation, and file handling for structured development.
- Implemented CRUD operations for efficient book and member management.
- Stored persistent records using file storage and successfully demonstrated the project under faculty supervision.

Movie Website (React Project) | React, JavaScript, CSS | 2026

- Focused on frontend performance, clean component structure, and scalable development practices.
- Implemented routing, state management, and responsive layouts for improved user experience.
- Integrated APIs to dynamically fetch and display movie information and ratings.
- Developed a responsive multi-page movie website using React with reusable components and modern UI design.
